【News Release】 December 21, 2016  
Converting Technology Exhibition Secretariat

To all members of the media:

**From Coating, Laminating, and Slitting Machines/Technologies to  
Advanced Films and Materials  
Be amazed by 300 companies over 650 booths!  
Converting Technology Exhibition**

From February 15-17 at Tokyo Big Sight, the Converting Technical Institute and JTB Communication Design will hold the [Converting Technology Exhibition](#) (consisting of six events).

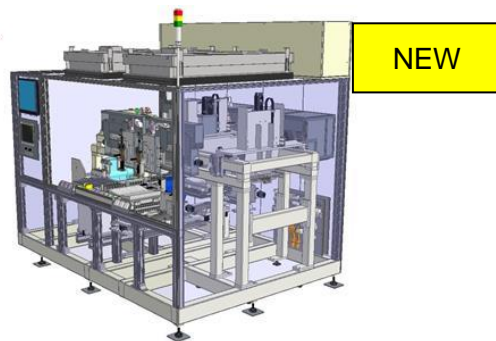

“**Converttech JAPAN**” is a comprehensive exhibition for all of the converting machines and technologies related to Coating, Laminating, and Slitting. Held together with the “**Advanced Printing Technology Exhibition**” and “**Prototype and Contracted Manufacturing Exhibition**”, this event brings together all of the coating, laminating, and printing technologies (gravure, flexo, etc.) and peripheral equipment that form the core of the converting industry, which today is reducing environmental impact, handling short-runs of many different products, and automating and managing manufacturing processes. “**neo functional material**” exhibition presents the functional materials (films, resins, additives, etc.) made possible by Japan’s cutting-edge, industry-supporting technology. The event will also offer a panel discussion on the OLED market and seminars that cover the latest trends in cellulose nanofiber and functional paper applications.

Converting Technology Exhibition also includes “**Printable Electronics**”, which aims to realize flexible and wearable electronic devices, and “**3Decotech Expo**”, which brings together the film decoration technologies and converting equipment that fuse function and design. Everyone should look forward to those six shows that compose the Converting Technology Exhibition.

NEW

**NISHIMURA MFG** SLITTER FN405E

NEW

**FUK** Curved Surface Lamination

Iwatani Materials, Shin-Nihon, AIKEI / EF ENGINEERING, NIHON DENGI, Yamaha Fine Technologies, NISHIMURA MFG, HELL Gravure Japan, OKAZAKI MACHINE INDUSTRY, MUSASHINO KIKAI, MIYAKO ROLLER INDUSTRIAL\*, SANKI MACHINERY\*, KINYOSHA, H.IKEUCHI, ASAHI SOKKI, RAYON INDUSTRIAL, SOFTAL Corona & Plasma Japan Branch, TOYOX, ORIENT SOGYO

▼ NEO Functional Paper Session February 16 (Thu.) 10 : 30-16:00

- Keynote Speech 10 : 30-11 : 10

**“Basics and application development of cellulose nanofibers”** Takashi Endo

Group Leader, Cellulose Materials Group, Research Institute of Sustainable Chemistry, National Institute of Advanced Industrial Science and Technology (AIST)

Other presenters include: SEIKO PMC, Nippon Paper Industries, TEIJIN, Rengo, Forestry and Forest Products Research Institute etc.

▼ Panel Discussion 【 Free 】

- February 15 (Wed.) 15 : 00-16 : 30

**“The aim of LCD panel and film suppliers for OLED market”**

Organizer : Society for Specialty Film Sponsor : Converting Technical Institute

Panelist : Japan Display, ZEON, Dai Nippon Printing

Moderator : Yano Research Institute

- February 16(Tue) 15 : 20-16 : 40

**“The Future of Automobile Interior/Exterior Components: the Potential for Paint-free Decoration”**

Panelist : TOYOTA, BASF, Fu-se Vacuum Forming, Idemitsu Unitech

Moderator : MTO Technology Office

\*Title and schedule are subject to change.
